Charge Smart. Drive Green.

VoltFlow

Smart EV Charging Management System

A unified platform to discover charging stations, manage chargers and understand network performance.

The Challenge

Fragmented charging experiences...

- **EV Drivers** — Finding a compatible, available charger can be difficult.
- **Network Operators** — Need visibility across stations and sessions.
- **Decision Makers** — Lack consolidated data for better planning.

Our Solution

VoltFlow brings everything together — from station discovery to operational analytics.

Key Features

- **Find & Book** — Locate nearby stations, compare options and reserve a slot.
- **Track & Charge** — Monitor sessions, energy and cost.
- **Operate Efficiently** — Manage stations, track maintenance.
- **Gain Insights** — View analytics on usage and revenue.

User Journey

1. **Discover** — Find stations and compare options.
2. **Book** — Choose a station and time slot.
3. **Charge** — Start and monitor a session.
4. **Complete** — Get final cost and save history.

Technology Stack

- React (TypeScript)
- Spring Boot (Java)
- MySQL
- Python (ML)

Future-Ready Intelligence

- Demand Forecasting
- Peak-Hour Insights
- Smart Recommendations

Key Benefits

- Greener Tomorrow
- Enhanced Efficiency
- Data-Driven Decisions

VoltFlow – Powering the Future of Electric Mobility
